Durable 7075 aluminum oval carabiner with screw gate, ideal for ascenders and rappel devices.

7075 aluminum alloy oval-shaped carabiner. The oval shape allows for symmetrical loading, making it ideal for use with ascenders and rappel devices.

Engineered with a robust design, it guarantees optimal performance with our Ropeman ascenders (Ropeman 1, 2, 4), pulleys, and other progression-capture mechanisms. This carabiner is certified for both mountaineering (EN 12275) and industrial applications (EN 362).

The Wildoval's almost-full section is optimized for smooth rope clamping when used with an ascender. Its wide cross-section, especially in the radius areas, ensures smooth rope glide, effective clamping and maximum durability when used with a Ropeman.

The screwgate closure features a red ring alert indicator, letting you know when the gate is accidentally left open.

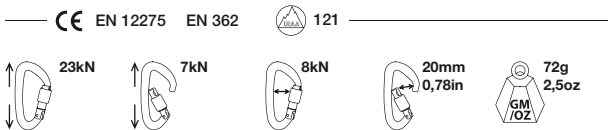

The oval design allows the Ropeman 4 to rotate 360 degrees around the carabiner body, perfect for situations where clamps are used with positioning lanyards.

The H cross-section optimizes the strength-to-weight ratio while protecting laser engravings from scratches, making this carabiner burly, durable, and ready for both climbing and heavy-duty applications.

- 7075 T6 aluminum alloy
- oval symmetrical design to keep loads on the major axis
- triple certification: Mountaineering EN 12275, UIAA 121, Work&Safety EN 362
- available in screwlock and trilock closures
- screwgate closure features a red ring alert indicator when the gate is left accidentally open
- strong and durable design
- Smooth radiuses cross-sections to ensure the best properties when in use with Ropemans or other ascenders
- H section optimizes strength to weight
- Ropeman 4 can rotate 360° over the carabiner body: suitable for use with clamps in lanyard positioning applications
- Sections optimized for best-in class rope sliding and rope clamping when in use with Ropeman 1 and 2
- snag-free keylock nose

Durable 7075 aluminum oval carabiner with trilock gate, ideal for ascenders and rappel devices.

7075 aluminum alloy oval-shaped carabiner with a triple-locking gate closure, to improve safety. The oval shape allows for symmetrical loading, making it ideal for use with ascenders and rappel devices.

Engineered with a robust design, it guarantees optimal performance with our Ropeman ascenders (Ropeman 1, 2, 4), pulleys, and other progression-capture mechanisms. This carabiner is certified for both mountaineering (EN 12275) and industrial applications (EN 362).

The Wildoval's almost-full section is optimized for smooth rope clamping when used with an ascender. Its wide cross-section, especially in the radius areas, ensures smooth rope glide, effective clamping and maximum durability when used with a Ropeman.

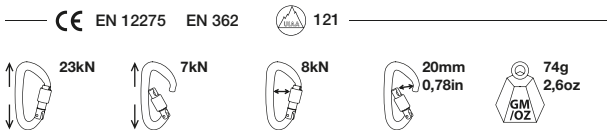

The trilock closure features a red ring alert indicator, letting you know when the gate is accidentally left open.

The keylock nose ensures snag-free operation. The H cross-section optimizes the strength-to-weight ratio while protecting laser engravings from scratches, making this carabiner burly, durable, and ready for both climbing and heavy-duty applications.

- 7075 T6 aluminum alloy
- oval symmetrical design to keep loads on the major axis
- triple certification: Mountaineering EN 12275, UIAA 121, Work&Safety EN 362
- available in screwlock and trilock closures

Durable, versatile, streamlined:
the ideal pack for fast alpine
exploration.

“If you ain’t flying, you ain’t trying.”

The Progress 25L pack is designed to crush multipitch alpine adventures. Built specifically for climbing quickly, it is perfect for glacial and snowy approaches, while offering unmatched freedom of movement during your climb.

Crafted for durability, with a streamlined design and ease of use in mind, this pack delivers everything you need to focus solely on your climb. The pack’s shape is designed to sit high on your back, ensuring easy access to your chalk bag and keeping gear loops free from interference. An adjustable, removable, sternum strap helps get the fit just right.

A quick-adjust drawcord closure at the top allows for easy one-handed access, especially when the two colored loops are secured at the belay point.

On the approach, the top flap also functions as a rope stabilizer. Need something from the bottom? The side entry zipper lets you grab that water bottle without hassle.

We’ve also included two hidden daisy chains for a clean look, while still offering endless options for attaching gear outside. The front pocket is the perfect stash for your phone, map, and other small quick access items.

When utmost packability is required the internal back padding can be removed, making the pack incredibly small.

- Durable 420-denier ripstop nylon
- Top-loading, drawstring fast-adjust closure
- Drawstring closure can be operated with one hand if the colored top loops are both secured at the belay point
- “High-on-back” design allows access to the chalk bag and avoids interference with gear loops
- Top flap closure/rope stabilizer: a small button is integrated to keep the flap secured when climbing
- Lateral compression straps can be adjusted in height via the integrated hidden daisy chain
- Two ice axe attachments
- Removable lightweight belt
- Lateral side zip access to the main compartment
- Roomy front pocket for valuables, topo, bars, headlamp
- Water bladder compatible
- Removable internal back panel: makes the pack very packable
- Double hidden daisy chain for added versatility
- Aluminum components to extend product lifecycle
- Top handle strength: 20 kg guaranteed
- Durable Water Treated (DWR) textiles , PFC free

Light, compact, streamlined:
the ideal pack for fast
multipitch adventures.

“If you ain’t flying, you ain’t trying.”

The Progress 18L pack is designed for fast multipitch adventures, where lightness and packability are essential. Specifically built for climbing quickly, it provides unmatched freedom of movement during your ascent.

Crafted for durability, with a streamlined design and ease of use in mind, this pack delivers everything you need to focus solely on your climb. The pack’s shape is designed to sit high on your back, ensuring easy access to your chalk bag and keeping gear loops free from interference. An adjustable, removable, sternum strap helps get the fit just right.

A quick-adjust drawcord closure at the top allows for easy one-handed access, especially when the two colored loops are secured at the belay point.

On the approach, the top flap also functions as a rope stabilizer. Need something from the bottom? The side entry zipper lets you grab that water bottle without hassle.

Two small daisy chains on the front panel maintain a clean look while still offering plenty of options for external gear storage. Additional daisy chains are integrated into the lower part of the front panel, allowing you to attach items like a helmet holder.

When utmost packability is required the internal back padding can be removed, making the pack incredibly small.

- Durable 420-denier ripstop nylon
- Top-loading, drawstring fast-adjust closure
- Drawstring closure can be operated with one hand if the colored top loops are both secured at the belay point
- “High-on-back” design allows access to the chalk bag and avoids interference with gear loops
- Top flap closure/rope stabilizer: a small button is integrated to keep the flap secured when climbing
- Lateral side zip access to the main compartment
- Water bladder compatible
- Removable internal back panel: makes the pack very packable
- Double front daisy chain for added versatility
- Small hidden daisy chains integrated in the bottom part of the front panel
- Top handle strength: 20 kg guaranteed
- Durable Water Treated (DWR) textiles , PFC free
