Original 13.75° camming angle

Advanced light weight short termination

New stem

‘Have you got the bag of ‘friends’ Ray?’ the name stuck …

Friends are the most iconic protection ever made. Throughout their 43 year tenure, although the construction has changed, their essence remains the same. At the heart of each iteration has been the definitive 13.75 cam angle; described, refined and developed by Wild Country and proven in thousands of miles of cracks climbed since 1977! This new Friend is no different, built with a twin axle it remains a Friend. At its core our 13.75 constant cam angle provides the axis around which future climbers will place their trust. Robust and reliable this Friend combines classic features and significant additions to create an intriguing mix of old and new. Externally, stylish with significant design flourishes mean the eye is drawn to any number of clever upgrades: hollow axles are stiffer for less weight; wide, skimmed lobes grip better yet are kinder on the rock; new 12mm dyneema sling is agile and easily extended, saving time and the weight of having to use a quickdraw on each. Internals are based on classic Wild Country foundations; our legendary holding power and the consistency of overlap between units, whilst the twin axle has allowed us to increase the range per unit. Available in sizes 0.4, 0.5, 0.75, 1, 2, 3, and 4.

FRIENDS-SET

This is design at its most practical making the new Friend the only twin axle cam that combines the convenience and comfort of a thumbloop with the speed and utility of an extendable sling. Faster, smoother, lighter in use and superbly finished; our clever combination of key features with innovative engineering makes the new Friend the most complete cam available.

High-friction machined cam faces

Effective flexible stem

Ergonomic floating trigger design

Soft, long-lasting aeronautical aluminum alloy and non-anodized lobes

Strong lightweight design

The original is back

Introducing the new Zeros for solid holding power in small placements.
The ultimate weapon for thin cracks, pockets on cutting-edge climbs and extreme adventures. This micro version of the iconic Friend has one of the narrowest heads on the market, which means it fits nicely in shallower placements. Engineered with a single axle, stainless steel termination swage, and one of the best expansion ranges going, it comes in six sizes for simpler racking and faster selection. We machined the extruded aluminium alloy lobes with a radical design to ensure maximum friction, minimum weight and reduced walking.

• The strong steel cable is protected by a flexible metal spring, an innovative design that offers enhanced protection and yet still bends effectively to accommodate downward pull in a horizontal placement.

• The easy-grab ergonomic thumb loop of our guided trigger system allows confident triggering with minimal flex, essential for accurate placement and removal. The thumb loop is also a boon to aid climbers, offering an easy place to clip etriers, daisies or fifis.

• The extendable Dyneema sewn sling gives you more flexibility in use and means you can reduce the number of quick draws on your rack. Its semi-rigid nature also means it stays open for easy access.

• Available in six sizes from 0,1 to 0,75.

Micro offset version of the iconic Friend

Introducing the new Offset zeros for solid holding power in small offset placements. The ultimate weapon for pin scars and flares. This micro offset version of the iconic Friend has one of the narrowest heads on the market, which means it fits nicely in shallower grooves with its slightly adapted version (17,6 °) of the definitive 13.75° constant camming angle. Engineered with a single axle, stainless steel termination swage, and one of the best expansion ranges going, it comes in 5 sizes for simpler racking and faster selection. We machined the extruded aluminium alloy lobes with a radical design to ensure maximum friction, minimum weight and reduced walking. This is cutting-edge design in practice. Faster, smoother, narrower and lighter to use with a highquality machined finish. Welcome to the new go-to micro offset cam for aid or free climbing.

- **Perfect for small offset placements like pin scars and flares**
- **5 differently colored sizes for simple racking and fast selection**
- **Effective flexible stem, protected by a flexible metal spring**
- **Soft, aeronautical aluminum alloy and non-anodized lobes**
- **Great expansion ranges**
- **Narrow Head with offset cam lobes**
- **High-Friction Machined Cam Faces**
- **Stem Protection with a flexible metal Spring**
- **Effective Flexible Stem**
- **Ergonomic Trigger Design**
- **Strong Lightweight Design**
- **Ergonomic Thumb Loop**
- **10mm Dyneema Extendable Sling**

ROCKS

40-RWA

The Rock with it's curved sides is a Wild Country original and revolutionised how we protect routes.

Still the backbone of an good rack, the current incarnation is considerably more advanced than it's predecessor and significantly lighter as well. Keeping the original ground-breaking curve, Rocks now come with thinner, lighter sidewalls, a lateral side taper, anodised heads for quick selection and an extended range - with fourteen sizes in all. Revolutionary when launched and still turning heads, the fully featured Rocks range are the benchmark units for the modern climber. Tapered sides anodised colour coding; lighter, thinner sidewalls; fit cracks 7mm to 50mm.

OUR HERITAGE COLOUR-CODING SYSTEM

NYLON SLING 15MM

/010036

Basic sling made from 15 mm flat nylon webbing in 60 cm, 120 cm and 240 cm lengths, with heritage colour coding.

Nylon is a durable, more affordable material, with more dynamic characteristics and better heat resistance where friction is a possible concern.

- 60, 120 and 240 cm long nylon 15 mm slings
- Durable
- Easier to untie knots compared to Dyneema
- Higher heat/friction resistance compared to Dyneema
- Heritage colour-coded length system for immediate length identification

DYNEMA SLING 10MM

40-DS10

Lightweight sling made from high-strength Dyneema – colour-coded in 60 cm, 120 cm, 180 cm and 240 cm lengths.

Dyneema has a higher strength-to-weight ratio than nylon, which makes these 10mm slings light, strong and versatile to use. In longer lengths, it's perfect for building Stanage-style anchors.

- 60, 120, 180 and 240 cm long Dyneema 10 mm slings
- Lightweight
- Abrasion & cut resistant
- Small diameter for versatility (threads, spike placements, extending anchors or belays)
- Heritage colour-coded length system for immediate length identification

PRO KEY WITH LEASH

40-PROKEYLSH

Adaptable and easy to use, this slick nut tool is well thought out.

Thin and accurate, the tip of the Pro Key is precision ground for rocks removal even in tiny slots; whilst at the opposite end there's a wide, flat surface for a firm and painless push with the palm.

Large holes along the length of the key keep weight to a minimum and a wire gate allows a direct clip to the harness.

It is provided with an extendable leash and clip that means you're safe from dropping it in tight spots.

WILDSCREW

/000014

Our new lightweight, versatile locking carabiner for all situations.

Made with an I Beam section construction that makes no compromises on either weight or strength. Weighing in at 48 grams, the Wildscrew is the ideal connection point when you want the security of a locking gate for maximum safety combined with easy handling.

- Screwgate closure
- Hot forged I beam section carabiner with optimized weight
- Wider rope and anchor contact surfaces for enhanced rope running and reduced carabiner wear
- Optimized slim nose design for smooth and easy clipping.
- Ergonomic design
- Weight: 48 grams

ASCENT HMS SCREW GATE 40-ASCENTHMS

An adaptable all-rounder the Ascent HMS is a strong, stylish choice.

Built for belaying and beyond the ample internals give plenty of room for set ups and the Keylock nose is a super-slick clip. Shaped to maximise gate open and optimise loading on tapes or belay loops it’s ergonomic and well thought out. Retaining a round bar at the rope end the smooth surface works well for rigging or with a Munter hitch.

- HMS – 12mm round bar
- Keylock nose
- High strength thimble
- ‘I beam’ back
- Hot forged

Wild Family

**A whole new Wild family –
the new Wild carabiner series.**

The new Astro, Wildwire, Wildsport and Wildscrew carabiners all inherit the distinctive genes of the Wild Country definitive design with their strong, weight-optimized I beam constructions that are hot forged in our patented Wild Country moulds. With their new slimmer nose designs and state-of-the art colour anodizing, the shared family traits are now more obvious than ever.

We're proud to introduce our next generation of carabiners – the Wild family.

WILDSPORT

/000012
/000013

Strong, secure and highly ergonomic carabiners with a solid straight and bent gate for modern sport climbing.

The Wildsport straight and bent gate have a strong, hot-forged I beam section construction for optimized weight.

The ergonomic solid gate design promotes easy handling and smoother clipping, while the clean nose reduces snagging on bolts when cleaning a route.

The perfect solution for the bolt and rope end of your sport quickdraw.

- Ergonomic design
- Hot forged I beam construction
- Wider contact surfaces for enhanced rope running, softer catches and reduced wear on both rope and carabiner
- Designed for smooth and easy clipping
- Weight: 43g

ELECTRON

40-ELECTSN
40-ELECTBG

The Electron is a great-value, versatile carabiner that does the business for both sport and trad rock climbing.

It has a wide gate and distinctive, ergonomic shape that supports smooth clipping, while the keylock nose prevents snagging. The hot forged solid gate construction and internal geometry provide lightweight strength, whilst minimising cross loading. The bent gate is engineered for the rope-side of a quickdraw. Covers all bases – from sport projects to multi-pitch alpine.

- Ergonomic design for superb handling and smooth action
- Keylock nose prevents snagging
- Hot forged
- Wide opening for easy clipping

WILDSPORT QUICKDRAW

/002017
/002018

Our strong, ergonomic sport climbing quickdraw for quick and easy clipping.

Wildsport carabiners have a strong, hot-forged I beam section construction for optimized weight.

Their ergonomic design promotes confident clipping, while the clean nose reduces snagging. The straight gate at the bolt end enables an easier clipping action, the bent gate at the rope end helps guide the rope into the carabiner for greater control. The thick, durable 16mm nylon sling is fitted with a plastic protector to prevent wear and twisting and maintain correct carabiner orientation.

- Wildsport Straight Gate at top and Wildsport Bent Gate at rope end
- Hot forged I beam section carabiners
- Quickdraw sling protector helps maintain the proper orientation and prevent wear
- Straight gate for quick and easy bolt clipping, bent gate at bottom for handling and control
- Wider contact surfaces for enhanced rope running and reduced carabiner wear
- Optimized slim nose design for smooth and easy clipping
- 12 cm, 17 cm sling lengths
- Available in a 6-pack with 12 cm slings

WILDHYBRID QUICKDRAW

/002019
/002020

Our strong, ergonomic, hybrid sport climbing quickdraw for quick and easy clipping.

Wildsport and Wildwire carabiners have a strong, hot-forged I beam section construction for optimized weight.

Their ergonomic design promotes confident clipping, while the clean hooded nose reduces snagging. The straight gate at the bolt end enables an easier clipping action, the wire gate at the rope end reduces overall weight – especially on longer sport routes. The thick, durable nylon sling is fitted with a plastic protector to prevent wear and twisting and maintain correct carabiner orientation.

- Hybrid quickdraw with Wildsport straight gate at top and Wildwire wire gate at bottom rope end
- Hot forged I beam section carabiners
- Quickdraw sling protector helps maintain the proper orientation and prevent wear
- Straight gate at top for quick and easy bolt clipping, bent gate for handling and control
- Wider contact surfaces for improved rope running and reduced carabiner wear
- Optimized slim nose design for smooth and easy clipping
- 12 cm, 17 cm sling lengths
- Available in a 6-pack with 12 cm slings

Wild Country heritage

Do you know who invented the Friends?
Well, that's a nice story to read. It's a story of friendship!

When Ray Jardine and Mark Vallance met in Colorado in 1975, two passionate climbers with very different backgrounds became climbing partners, friends, and later business partners. Their shared passion enabled them to revolutionize the climbing world with innovation of the Friend.

Ray began to work on his first prototype Friend in 1971, which was just four cams on an axle without a trigger. However, when they were finally ready for production, Ray was not able to realize the project in the US and he turned to Mark.

Together they built a production site in Peak District, UK.

Although the Friends were not cheap to buy, the demand was high and soon Mark and Ray were able to establish their own climbing brand, advance the Friend and realize new ideas. This was the birth of Wild Country and the Friend in 1977.

But why are they called Friends?
Ray always carried a couple of his prototypes around with him, but kept it a secret. When he was out climbing with a group, his buddy Chris Walker, who was privy to the secret, wanted to know whether Ray had brought his new climbing protection. In order not to draw attention he asked, "Have you brought the bag of friends, Ray?". The rest is history.

Wild Country and the Friend are so deeply intertwined that one might forget, that the Friend is only the beginning of a success story that is still not over.
The Friend was followed by innovations such as the Rocks, the world's first curved Nuts, and their radically reinterpreted successor, the Superrock and the Rockcentrics. With the Ropeman MK1, the smallest ascender at the time, Helium, the lightest full-size carabiner, and the award winning semi-automatic Revo, Wild Country repeatedly set new standards regarding function, size, weight, and safety.

#makingfriendssince1977

SESSION QUICKDRAW

/002002
/002003

A robust, durable and versatile quickdraw that offers easy handling and excellent value.
In two lenghts: 12cm and 17cm.

- Easy handling Session krabs
- Available with 12cm or 17cm polyester sling
- High strength
- Hot forged
- Keylock nose prevents snagging when unclipping
- Solid straight gate
- I beam back
- Optimised for optimum strength/weight ratio

ELECTRON SPORT DRAW

/002007
/002008

The asymmetrically shaped Electron carabiners have a distinctive, ergonomic shape and a wide gate for easier clipping, while their keylock nose promotes snag-free clipping.

To make them lighter without compromising strength, we use a hot-forged construction with an I beam back. The solid, robust straight gate design gives improved handling and a controlled clipping action, while the concave design of the bent gate at the rope end helps guide the rope into the carabiner. And the ergonomic, tapered shape of the thick, durable nylon webbing sling makes it easier to grab and haul when working routes.

product video:

- Ergonomic design for superb handling and smooth action
- Hot forged I beam construction
- Keylock nose prevents snagging
- Wide opening for easy clipping
- Modified vari-width nylon webbing now easier to grab
- 'Vice' sling protector ensures rope end biner is correctly orientated
- Available in two lengths: 12cm and 17cm
- Six pack available with 12cm slings

HELIUM 3.0 QUICKDRAW

/002000
/002001

The ultimate on-sight trad 'draw, our Heliums are the definitive 5-star choice for climbers who make no compromises.

We've updated the 'clean-lock' nose wiregate for even greater security. High strength and low weight, thanks to our pioneering 'I beam' back construction. They feature our 10mm Dyneema and come in three lengths: 10cm, 15cm and 20cm. Also available as a pack six packs of 10cm draws.

- Enhanced nose design
- Superlight
- Clean-wire, no-hook gate
- 2 mm wire gate
- I beam section
- Hot forged
- High gate open strength
- 10 mm Dyneema
- Vice locator
- 10 mm Dyneema slings colour-coded for easy recognition: red = 10 cm, blue = 15 cm, green = 20 cm)

ASTRO QUICKDRAW

/002013
/002014

NEW

Our lightest quickdraw that sits firmly in the superlight category.

The new, redesigned Astro is the perfect weapon for a lightweight alpine blitz or trad project where every gram counts. It has a sleeker, optimized I beam construction and refined nose for slicker clipping. In addition, the improved sling construction combats twisting at the lower carabiner. With a narrower, clean hooded nose and tech wire for snag free security.

The perfect quickdraw for trad and alpine when you're looking to reduce the weight of your rack.

- Hot-forged I beam Astro carabiners
- Tech wire gate
- Hooded nose, small gate notch for reduced snagging
- 10 mm Dyneema slings colour-coded for easy recognition: red = 10 cm, blue = 15 cm, green = 20 cm)
- New construction fully sewn Dyneema sling that combats the twisting effect on the lower carabiner.

WILDWIRE QUICKDRAW

/002021
/002022

NEW

A lightweight quickdraw with our definitive workhorse wiregate carabiner.

The new, redesigned update of our best-selling Wildwire carabiner with its strong, hot-forged 'I beam' construction for weight optimization now has a leaner, sleeker profile and optimized, slimmer hooded nose.

The smooth-action wire gate is double kinked to provide an easier grip when clipping, offers maximum weight saving to reduce the weight of your rack and resists freezing in winter, while the generous rope basket promotes smooth rope running and softer catches.

- Redesigned Wildwire carabiners
- Hot forged I beam construction
- 1.5 mm wiregate spring
- Wider rope and anchor contact surfaces for enhanced rope running and reduced carabiner wear
- Hooded nose with small gate notch for reduced snagging
- Tech wire gate
- New construction fully sewn Dyneema sling that allows the rope to run smoothly but combats the twisting effect on the lower carabiner
- 10 mm Dyneema slings colour-coded for easy recognition: red = 10 cm, blue = 15 cm, green = 20 cm)

WILDWIRE ALPINE QUICKDRAW

/002023

NEW

Our definitive workhorse wiregate carabiners on an extendable sling. For alpine vibes.

The Wild Country Wildwire Alpine Draw features lightweight Wildwire biners mounted on an extendable 60 cm Dyneema sling.

The new, redesigned update of our best-selling Wildwire carabiner with its strong, hot-forged 'I beam' construction for optimized weight now has a leaner, sleeker profile and smaller hooded nose.

The lightweight, flexible 10 mm Dyneema sling is weather and abrasion resistant and has a higher ratio than standard nylon webbing. Its narrow diameter makes it ideal for use in threads, spike placements and extending protection

- Redesigned Wildwire carabiners
- Hot forged I beam construction
- 1.5 mm wiregate spring
- Wider rope and anchor contact surfaces for enhanced rope running and reduced carabiner wear
- Hooded nose with small gate notch for reduced snagging
- Tech wire gate for maximum weight saving
- 60 cm Dyneema sling, 10 mm, 22 kN Strength

REVO

Makes belaying simple and safe: the REVO.

The only automatically locking belay device which has a completely panic-proof locking mechanism.

The REVO has no method of over-riding the locking mechanism, during belaying, or when lowering a climber. Is bi-directional, the locking function works regardless of the rope direction. Has an intuitive belaying method, which requires no changes to standard belaying technique. Has no need for a specific locking karabiner. All of these USP's contribute to make the REVO the safest belay device available.

The REVO is the first Bi-Directional assisted locking belay device. Its function is independent from the loading orientation of the rope, thus eliminating one of the most common causes of belay related accidents. Irrespective of the situation, an uncontrolled descent will cause the inertia reel to activate, grip the rope and arrest the fall. The innovative panic-proof locking mechanism (pat. pending) removes the necessity for a handle to unlock the system when lowering the climber. The device is intuitive to use like a traditional belay plate and is thus suited for both the novice and expert alike. The clever combination of these features makes the Revo the safest belay device on the market.

- Innovative bi-directional locking function
- Patent pending inertia reel locking mechanism
- Compatible with rope diameters 8.5-11.0mm EN 892: 1998 TYPE A
- Forged high strength aircraft aluminium body
- Compatible with any karabiner to EN 12275

MOVEMENT BEALAY DEVICE

/005001
/005000

NEW

A complete belay kit for gym and crag climbing consisting of an assisted-braking belay device plus a dedicated screwgate hard anodized carabiner.

Designed to offer smooth rope handling, secure lock offs, safer fall catching and more controlled lowering – with assisted locking for an extra level of safety.

The Movement ergonomic belay device is intuitive to use and promotes good belay practice by encouraging the brake hand to remain on the rope at all times. The robust construction features hardened steel parts at all rope contact areas to prevent wear, while its textured thermoplastic (TPU) grip area extends right up to the thumb catch zone.

The Movement carabiner is a robust screwlock, rope-friendly HMS biner with an internal spring bar to ensure correct orientation while belaying. Made of high-grade aluminium, it is hard anodized to increase wear resistance over time.

The Movement is ideal both for lead climbing and top roping and is rated for use with single ropes from 8.5 to 11 mm.

The Movement Belay Device is also available separately on its own.

MOVEMENT BELAY DEVICE **KIT**

Movement geometrically-assisted belay device

- Single rope diameter range: 8.5 to 11 mm
- Ergonomic design with extended front thumb catch zone
- Durable construction: all braking elements and rope contact parts in steel
- Certifications: EN 15151, UIAA 129

Movement carabiner

- Strong, aluminium HMS carabiner
- Ideal for use with the Movement belay device
- Manual locking screwgate
- Internal spring bar to ensure correct orientation
- Large, rounded rope bearing surface, designed to promote smooth belaying
- Hard anodized finished for greater wear resistance and extended lifespan
- Carabiner certification: CE EN 12275, UIAA 121

PRO GUIDE LITE

40-PROGUIDLT

For use in mountain and crag environments by alpinists and adventure climbers, the Pro Guide Lite is ergonomic, smooth and simple to operate.

Our advanced belay tool demonstrates engineering excellence and this remarkably lightweight device has been trimmed of all excess. Its deep ribbed grooves handle a vast range of ropes from 7.7mm alpine cords upwards. Operated in ‘guide mode’, the pro guide lite is perfect for bringing up twin followers and locks perfectly with every fall. With a larger ‘release slot’, suitable for a karabiner, the tool is simple to release under load.

- Enhanced nose design
- New lightweight forging saves weight
- Guide mode
- Compatible karabiner release function
- Efficient breaking slots
- Flexible cable leash
- Karabiner release function
- New oversize belay karabiner hole enables complete karabiner roatation
- Weight 70 gmsg / 2,68 oz

ROPEMAN 1

40-ROPE1

The original Ropeman has been a bestseller for over 10 years and is a benchmark mountain product.

The Ropeman 1 has an alloy cam that keeps weight down. It is easy to place on ropes with a simple action to open the sprung sideplates. The flat cam profile is easy to release, even under light loads. The Ropeman 1 has recently been upgraded with forged sideplates for increased strength, less weight and an even better fit. Ideal for self rescue, prussiking, pulleys and mouflage, the list of uses for these small but perfectly formed devices is endless.

- Hot forged side plates
- Alloy cam
- High strength stainless steal axel
- Stainless steal cable leash
- Alloy 7075 T6, >10mm. 3 Sigma rated, CE EN567, UIAA 126.

ROPEMAN 2

40-ROPE2

Built with a stainless steel cam, the Ropeman 2 works with a wide range of rope diameters and has become 'standard issue' for many mountaineering and crag activities.

Recent upgrades include forged sideplates, making the product lighter and providing a better internal radius for smooth operation across a broader range of karabiners. From self-rescue and cliff rescue to mouflage and more, these mini-marvels have been well proven in the field.

- Hot forged side plates
- Stainless steel cam
- High strength stainless steal axel
- Stainless steal cable leash

ROPEMAN 4

/006000

A lightweight, compact and versatile rope clamp ascender.

The Ropeman 4 is the latest, innovative evolution of the original Wild Country ascender.

This compact rope clamp covers a wide range of technical applications, including emergency rescue, self-rescue, ascending, self-belay and positioning lanyard adjustment.

The new, improved side plate grooved closure mechanism prevents lateral sideplate opening when ascending a rope, and ensures that no rope gets stuck between the sideplate and the cam, making it more efficient and safer than comparable devices.

Made from lightweight, strong aluminium alloy and designed to work with a wide range of rope diameters, it also works with flat and tubular webbing slings and is compatible with HMS and oval carabiners. The ample pin hole design allows full rotation of the device around the carabiner. The strong stainless steel wire is covered with a durable plastic sheath for safe and easy handling.

The Ropeman 4 has a small, lightweight design that makes it easy to carry one on your harness at all times. An essential piece of gear for all vertical adventures.

- Rope diameter range: Ø: 8-13mm
- Spring-loaded side plate for easy closure
- Closure mechanism prevents lateral sideplate opening (the grooved sideplate locks directly into the pin)
- High strength stainless steel axle
- Compatible with flat and tubular slings* from 10 mm to 15 mm
- Stainless steel wire (2kN tested) with plastic sheath for safe handling
- Compatible with ropes following EN492 standard
- Compatible with HMS and Oval carabiners (EN 12275)
- Certification: mountaineering EN 567, UIAA126 and work safety EN 12841

*SLINGS EN 566 10-15 mm - (Attention! Exceptional application, not covered by EN 567 standard, not to be used for protection against falls from height). Do not use as a single safety line.

SESSION HELMET

/007002 NEW

A lightweight and comfortable helmet with a streamlined design that covers all bases from cragging to alpine, multipitch and ice.

The Session helmet has a hybrid construction that combines a foam-injection EPP Expanded Polypropylene (EPP) core with an Expanded Polystyrene (EPS) impact protection top zone covered with a hard polycarbonate (PC) top and back plate to ensure higher safety at a lower weight, plus enhanced side, front and rear impact protection.

Its ergonomic, lightweight design gives a great fit and streamlined profile, while the generous side venting ensures a constant supply of fresh air to help you keep a cool head. Inside, the low-profile, robust, and soft webbing strap system is fully-adjustable at the chin and under the ears to adapt to the shape of your head. The comfortable padding inserts absorb perspiration and alleviate pressure – and are also easy to detach, wash or replace.
Securely accommodates all types of headlamps.

- **Impact tested according to EN 12492 and UIAA 106**
- **Unisex sizing: S/M: 52-58cm and L/XL: 57-62cm**
- **Weight: S/M: 200g and L/XL: 220g**
- **Hybrid EPP, EPS & PC construction for outstanding shock absorption, stability, and lightness**
- **Large side vent openings**
- **Fully-adjustable and fully-replaceable chin strap fitting system – also available as spare part**
- **Headlamp attachment two lamp clips at the front, rear elastic cord – fully replaceable and available as spare part**
- **Removable and washable padding – also available as spare part**
- **Front helmet shape specially designed for compatibility with sunglasses and goggles**

product video:

A durable, versatile helmet for all disciplines from sport to trad and alpine climbing.

The Wild Country Syncro has a robust in-mould construction with an expanded polystyrene foam core and a tough polycarbonate shell with reinforced top plate for additional protection against top, side, front, and rear impact. The low-profile strap system with soft webbing is fully-adjustable to adapt to the shape of the head for optimal comfort. Side and back openings offer generous ventilation and the helmet comes in some very stylish colourways.

The perfect protection for all-year round versatile climbing and mountaineering use.

- **Certified for climbing and mountaineering according to EN 12492 standard + UIAA106**
- **Lightweight in-mould construction**
- **Polycarbonate shell with expanded polystyrene for enhanced protection**
- **Very comfortable fit**
- **All-strap fitting system: height and width adjustable straps**
- **Strap dividers for adjustment around the ear**
- **Soft, removable and washable velcro-attach padding**
- **Generous vents**
- **Two front headlamp clips**
- **Safety buckle**
- **Weight: 260 grams**
- **Size: UNI 56-61 cm**

Fair Wear Foundation

The Fair Wear Foundation is an independent non-profit organisation that works with companies to improve working conditions. It focuses specifically in the sewing, cutting and trimming phases of the textile industry.

The FWF engages directly with companies, factories, trade unions, NGOs and governments. Wild Country has been an active member of the Fair Wear Foundation since 2013. We are committed to maintaining long-term relationships with our production partners and to improving working conditions. The majority of our suppliers are audited and after each verification, we implement a corrective action plan where we aim at closing all the findings reported. We set a timeline for the improvements and we work closely with the factory to make all the adjustments needed. In 2016, Wild Country achieved Fair Wear Foundation leader status and we have worked hard to maintain it ever since.

As a Fair Wear Foundation member, we are committed to the Foundation's labour standards:

1. Employment is freely chosen
2. Freedom of association and the right to collective bargaining
3. There is no discrimination in employment
4. No exploitation of child labour
5. Payment of living wage
6. Reasonable hours of work
7. Safe and healthy working conditions
8. Legally binding employment relationship

The Fair Wear Foundation helps us in conducting the audits and improving working condition at our suppliers – and talks directly to the workers that make our clothing, packs, slings and harnesses on the shop floor. Every year, it reviews our work to see whether we are improving working conditions and assesses our internal organisation and processes. The results of the verification are then published in the Brand Performance Check.

"As a brand, we're aware of our social and ethical responsibility. We want to do everything we can to improve the lives and working conditions of the people who make our products."

Stefan Zublasing, Wild Country brand manager

See also the Brand Performance Check on our website.

MOSQUITO PRO HARNESS

/008012

Alpine vibes: the Mosquito Pro.

A versatile harness engineered for multi-pitch, alpine and trad adventures that won't disappoint for all-round use.

Engineered for trad climbing, multi-pitch climbing, ice climbing, mountaineering and, why not, sport climbing – the Mosquito Pro is all about freedom of movement with its sleek construction that adapts for full, unhindered, flexibility as you climb.

Looking for a lightweight, yet supportive harness? The advanced laminated waistbelt construction features three internal webbing straps that distribute load evenly across the generous waistband for greater comfort, for example at hanging belays. And the super-light breathable mesh padding and robust, fast-drying, abrasion-resistant, stretch ripstop covering with seamless edges keeps things soft and smooth next to the skin.

Want plenty of space and racking options? You get two large, rigid thermoplastic front gear loops and three rear gear loops that work well when wearing a pack, giving you the versatility and storage capacity for a full trad rack and ice screws on alpine missions. All gear loops are designed specifically to keep your gear and draws away from the harness for smoother retrieval.

Like full flexibility? The wide, comfortable waistbelt fits all body types, while the adjustable leg loops easily adapt to accommodate more layers for climbing in any season.

The Mosquito Pro packs down to give a compact storage size in your alpine pack.

- 3 webbing belt construction, wide waistbelt and leg loops design for maximum support, comfort and pressure distribution
- Folds to give compact pack size
- Abrasion-resistant stretch ripstop fabric
- PFC-free DWR treated textile
- Lightweight padding and breathable mesh
- 3-buckle design for full adjustability with layers (alpine use and ice climbing)
- 2 ice tool holder slots
- Integrated wear indicator at lower tie-in point
- 3 lightweight aluminium buckles
- 5 gear loops for multiple racking options
- Front wide TPU injection-moulded loops for easier gear retrieval
- Fifth gear loop for backup/ haul line
- Unisex design
- 16 mm Dyneema belay loop
- Supplied with protective storage bag
- Weight: 340g in M size

product video:

Superlight, superfly: the Mosquito.

An extremely lightweight, minimalistic, high-end sport climbing harness that weighs just 220 grams.

This is the lightest harness Wild Country has ever made. Engineered specifically for sport climbing, its precise fit delivers super-lightweight comfort, agility and freedom of movement. The advanced, lightweight, laminated waistbelt construction features internal load-bearing webbing that distributes the load evenly across the entire harness structure, combined with super-light mesh padding and a robust, fast-drying and abrasion-resistant covering with seamless edges that is soft and smooth next to the skin. This harness is built specifically with freedom of movement in mind. Its sleek, stripped-down construction adapts to your body for full, unhindered, flexibility as you climb. An important stand-out safety feature is the wear indicator on the reinforced lower tie-in point – a feature used by Wild Country since the 1990s. To clearly indicate when it is time to retire the harness, it has red threads that only become visible after excessive wear and abrasion.

The Mosquito is equipped with lightweight gear loops: two rigid front loops, two softer back loops, to prevent pressure points when climbing with a pack. All gear loops are designed specifically to hold your gear and draws away from the harness for smoother retrieval. There is also a decent-sized rear haul loop that also doubles as a chalk bag attachment point.

With a self-locking, aluminium slide block buckle on the waistbelt to ensure a secure and comfortable fit plus lightweight, supportive leg loops with elasticated risers. The Mosquito packs down small and comes in a stylish, two-tone black and white design with a classic Wild Country tangerine orange buckle.

- Ultra-lightweight: 220g (size XS)
- Lightweight, smooth, abrasion-resistant, ripstop fabric
- Engineered for full freedom of movement and to evenly disperse load
- Integrated wear indicator at lower tie-in point
- Lightweight aluminium buckle for secure and comfortable fit
- Four lightweight gear loops: two rigid front gear loops, two flexible, low-profile rear gear loops that won't interfere with a pack Fixed leg loops with elasticated risers
- Rear haul/ gear loop
- Supplied with a lightweight protective storage bag

WILDCOUNTRY

MOSQUITO WOMEN'S HARNESS

/008011

Superlight, superfly : the Mosquito.

For women who dare – our extremely lightweight, minimalistic, high-end sport climbing harness with a women's-specific fit.

The Mosquito women's harness is a performance sports climbing harness with a Wild Country women's specific fit that delivers a precise fit with super-lightweight comfort, agility and freedom of movement.

The advanced, lightweight, laminated waistbelt construction is designed specifically to fit the female anatomy. We conducted extensive field testing with women climbers to perfect its shape and dimensions. The new anatomic waistbelt is wider at the centre of the back to provide more support and shaped to fit the female pelvis and reduce pressure points. We've increased the leg loop diameter, but decreased the waistbelt diameter. Our women's harnesses have a longer rise – the distance between the waistbelt and leg loops – for a better overall fit. This also makes them more comfortable to hang in for longer periods, such as during hanging belays or when working projects.

The Mosquito is built specifically with freedom of movement in mind. Its sleek, stripped-down construction adapts to your body for full, unhindered, flexibility as you climb. It's equipped with lightweight gear loops: two rigid front loops, two softer back loops. All gear loops are designed specifically to hold your gear and draws away from the harness for smoother retrieval. An important stand-out safety feature is the wear indicator on the reinforced lower tie-in point. With a self-locking, aluminium slide block buckle on the waistbelt to ensure a secure and comfortable fit plus lightweight, supportive leg loops with elasticated risers.

The Mosquito packs down small and comes in a stylish, two-tone design.

- Wild Country women's specific fit for increased comfort with anatomic waistbelt, adapted waist-leg-ratio and longer rise
- Ultra-lightweight: 240g (size XS)
- Lightweight, smooth abrasion-resistant, ripstop fabric
- Engineered for full freedom of movement and to evenly disperse load
- Integrated wear indicator at lower tie-in point
- Lightweight aluminium buckle for secure and comfortable fit
- Four lightweight gear loops: two rigid front gear loops, two flexible, low-profile rear gear loops
- Fixed leg loops with elasticated risers
- Rear haul/gear loop
- Supplied with a lightweight protective storage bag
- Wild Country is a member of the Fair Wear Foundation

Women's specific fit

It goes without saying that we all need a harness that is comfortable for walking, climbing and hanging in. So why are so few harnesses designed specifically for women?

At Wild Country, we've gone back to the drawing board to channel our extensive climbing experience to design a new collection of harnesses with a Women's Specific Fit. We conducted extensive field testing with women climbers to perfect its shape and dimensions.

Why do women need a differently-shaped harness?

- **The rise of a women's waist tends to be longer, i.e. women need more space between leg loops and waist belt**
- **Women have a different waist-to-leg size ratio than men**
- **The angle of a women's pelvis is different**
- **Women's bodies vary in shape more than men.**

As a result, women generally find it more comfortable when a harness sits on their waist, rather than around their hips.

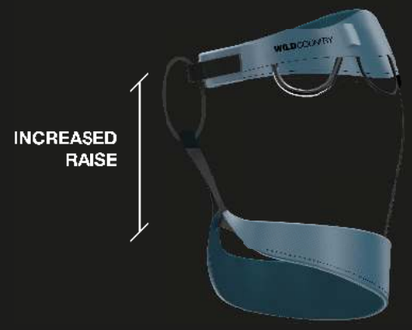

DECREASED WAIST BELT

INCREASED LEG LOOP

The Wild Country Women's Specific Fit

This is why we have developed a new ergonomic construction, designed specifically to fit the female anatomy.

Waistbelt: The new anatomic waistbelt has a unique shape that is studied to fit the female pelvis. It's narrower at the hips to reduce pressure points, but wider at the centre of the back to provide more support and transfer load more effectively.

Waist-leg-ratio: We've increased the leg loop diameter, but decreased the waistbelt diameter.

Rise: Our women's harnesses have a longer distance between the waistbelt and leg loops

This provides a better fit for the majority of women and also makes the harness more comfortable to hang in for longer periods, such as for hanging belays or when working projects.

FLOW 2.0 MEN'S HARNESS

/008009

A comfortable, all-round men's harness for indoor, outdoor, sport and multi-pitch use.

The Flow 2.0 men's harness is engineered with a clean, sleek design and comfortable padding for enhanced support and breathability.

The waistbelt construction ensures that loading is well distributed across the lower back to prevent pressure points. Its soft webbing and generous air-permeable padding has a comfortable inner mesh fabric lining. With a pre-threaded, smooth-running adjustable buckle to prevent tying-in errors, fixed leg loops and reinforced lower tie-in point with wear indicator for additional safety.

product video:

- Designed for optimum comfort
- Soft inner mesh fabric padding and edges
- Four 3D gear loops
- Single steel buckle for secure closure
- Adjustable waistbelt
- Fixed, elasticated leg loops with adjustable top clip
- Integrated wear indicator at lower tie-in point
- Two slots for ice screw/tool holders
- Rear haul loop
- PFC-free
- Storage bag included
- Four 3D SHAPED gearloops
- Wild Country is a member of the Fair Wear Foundation

FLOW 2.0 WOMEN'S HARNESS

/008010

A comfortable, all-round harness with a women's-specific fit for indoor, outdoor, sport and multi-pitch use.

The Flow 2.0 harness is engineered with a clean, sleek design and comfortable padding for enhanced support and breathability.

The waistbelt construction ensures that loading is well distributed across the lower back to prevent pressure points. Its soft webbing and generous air-permeable padding has a comfortable inner mesh fabric lining. With a pre-threaded, smooth-running adjustable buckle to prevent tying-in errors, fixed leg loops and reinforced lower tie-in point with wear indicator for additional safety.

The Flow women's harness is designed specifically to fit the female anatomy. We conducted extensive field testing with women climbers to tweak the shape and dimensions. The new anatomic waistbelt is shaped to fit the female pelvis and reduce pressure points, yet is wider at the centre of the back to provide more support. We've increased the leg loop diameter, but decreased the waistbelt diameter. Our women's harnesses have a longer rise – the distance between the waistbelt and leg loops – for a better fit that is also more comfortable to hang in.

Your go-to all-round women's harness.

SESSION 2.0 MEN'S HARNESS

/008013 NEW

The new Session 2.0 is a versatile harness with a comfortable fit.

Our popular best-seller covers all disciplines from sport to alpine, ice, trad and multi-pitch.

The Session 2.0 is the latest version of our all-round harness. It stands out in the Wild Country range as offering the best mix of comfort and versatility of use. With good padding to guarantee comfort and support at belay points or while hanging and four structured, wide gear loops that offer plenty of space to rack all your quickdraws, Rocks and Friends. The integrated Ice tool slots also make it suitable for ice climbing.

The new, super-abrasion resistant ripstop textile improves overall durability and the hip belt now benefits from a highly breathable, moisture-wicking mesh on the inside to help keep you cool when you're cranking hard.

This harness has a 16 mm Dyneema tie-in loop and a wear indicator on the reinforced lower tie-in point.

100% comfort on versatility of use

- New abrasion-resistant ripstop outer fabric
- PFC-free DWR treated textile
- Ventilated and supportive padding
- Breathable and moisture-wicking mesh interior
- 4 spacious rigid gear loops
- 1 backloop
- 2 ice tool holder slots
- Low-profile, aluminium slide buckles for smooth adjustment
- Adjustable leg loops
- Wear indicator at lower tie-in point: Its inner red threads only become visible after excessive wear and abrasion to indicate when it is time to retire the harness.
- 16 mm Dyneema belay loop
- Optimum balance between comfort and weight
- Supplied with protective storage bag
- All textiles from Fair Wear suppliers
- Weight: 425 grams in M size

WILDCOUNTRY

MOVEMENT HARNESS

/008007

The Wild Country Movement Harness is an extremely versatile harness for all climbing styles, from sports to multi-pitch and via ferrata.

It gives good comfort for: moving around, walking or standing at the base of the crag; hanging in – whether dogging while on lead or resting while top-roping; and belaying in – including for longer periods. The wide and well-padded leg loops distribute the load with their dual webbing straps and are quick and easy to adjust thanks to the dual buckles so that you can customise them according to the number of layers you're wearing or for different leg sizes. Both the waist belt and leg loops offer effective moisture transport for summer use.
There are four gear loops and a small rear accessory loop for your chalk bag or shoes.

product video:

- **Versatility for all conditions – four buckles for maximum adjustability at waist and legs**
- **Comfortable design and padding**
- **Durable and robust ripstop material**
- **Dual slide block, waist belt buckles**
- **Adjustable leg loops**
- **Dual slide block, leg buckles**
- **Two spacious rigid gear loops at front for easy clipping**
- **Two spacious gear loops at back, soft for comfortable fit with a backpack**
- **Available in two sizes**
- **Supplied with protective storage bag**

MOVEMENT JUNIOR HARNESS

/008008

The Wild Country Movement Kids Harness is a seat harness for kids that want to climb top rope or lead.

The wide waist belt with an ergonomically-shaped padded webbing construction is designed to ensure good weight distribution and thanks to the adjustable waist belt and leg loops – both with dual slide block buckles – this is a harness that is quick and easy to adjust. Both the waist belt and leg loops offer effective moisture transport for summer use.

There are two gear loops that stand out for easy clipping. Both leg loops have clear indicators on the inside for easy identification to see which foot goes where – putting the harness is more intuitive. The belay loop/tie-in points are set high to keep young climbers upright, while the rear elastic risers keep the leg loops up in place. In addition, the distinctive yellow tie-in loop helps promote good tying-in technique and also makes for easier partner checking before starting each pitch.

product video:

- **Full versatility– four buckles for maximum adjustability at waist and legs**
- **Comfortable design and padding**
- **Durable and robust ripstop material**
- **Dual slide block, waist belt buckles**
- **Adjustable leg loops**
- **Dual slide block, leg buckles**
- **Two spacious rigid gear loops for easy clipping**
- **Yellow tie-in loop for easy, safe and secure tie-in recognition**
- **Supplied with protective storage bag**
- **Leg loops are marked on the inside for easy left/right recognition**

WILDCOUNTRY

SYNCRO HARNESS

/008006

A burly big wall harness that will go anywhere.

The super-comfortable Wild Country Syncro is ideal for long days multi-pitch climbing, aid climbing or guiding.

We took the best elements of the old Syncro, our fully-featured big capacity multi-pitch harness, and then went back to the drawing board. The result is a completely new construction that offers superior versatility, comfort, support and ventilation with maximum gear carrying capacity for long lines and big wall projects – and all at a reasonable weight. Made from our new frame construction with super comfortable padding, and matched with robust, abrasion-resistant Dura-Weave covering, the Syncro offers a proven combination of durability, flexibility and weight distribution for hanging belays and long days without uncomfortable pressure points. We also give the reinforced lower tie-in point a wear indicator. It has red threads that only become visible after excessive wear and abrasion, to show when it is time to replace the harness. A further important stand-out feature is the ventilated Air Mesh zone for increased breathability in the lumbar region.

The two beefy slide block buckles on the 25 mm webbing waistbelt and on the 20mm webbing leg loops can be fully opened to make the harness easier to put on when wearing skis or crampons. For each of the four buckles you get elastic strap retainers to prevent loose ends.

product video:

The Syncro features a total of six gear loops with two rigid front loops and four softer loops at the back for multiple racking options and uncluttered organisation. The gear loops are also specifically designed for easy gear retrieval and its twin buckles at the waist allow you to keep everything centred, no matter how many layers you're wearing. And there are two slots for carrying tool or ice screw holders and a decent-sized rear haul loop too.

- **Maximum comfort when hanging: well-cushioned, broad waistbelt distributes load over entire surface area**
- **Engineered for balanced weight distribution and maximum stability, no matter how big your rack**
- **Ergonomically-shaped, adjustable leg loops and waistbelt remain comfortable while moving**
- **Dual slide block, aluminium waist buckles allow tie-in point to be centred and equalize gear loops**
- **Dual slide block, aluminium leg buckles for full adjustment, including over winter layers**
- **Ventilated Air Mesh zone for increased breathability at the lumbar region**
- **Integrated wear indicator at lower tie-inpoint**
- **Six gear loops: two rigid front gear loops, four flexible rear gear loops for organised racking, optimum separation and to prevent bunching**
- **Two attachment points for ice screw/tool holders**
- **Rear haul/ gear loop**
- **Unisex design**

CRAG HAULER 40

/010031

The 40-litre top loader, self-standing bombproof pack for a full day at the crag.

Sitting by the door or in the back of the van, this is the pack you never really empty. It's always packed and ready to head out – whether for a day of desert sandstone splitters or a trip to your favourite limestone sport crag.

The Crag Hauler 40 is a tough, durable haul-bag inspired, self-standing pack with the capacity to go anywhere. Engineered for best-in-class durability with haul bag tarpaulin, reinforced ripstop nylon and bombproof YKK® zippers. The nylon roll-top closure has an additional PFC-free Durable Water Repellent (DWR) treatment to make the pack water resistant. Ease of use and versatility is the name of the game here, such as the wide-opening funnel shaped roll top-flap that packs away quickly and the top flap closure that also doubles as a rope fixation. For a more stable carry, the lateral compression straps also work as rope stabilizers or can be hidden away in the structure when not in use for a sleeker look.

The Crag Hauler 40 offers big volume to stash all your gear, while the self-standing design, also means that you can chuck kit straight in when you're in a hurry. The large full length J-shaped front zip ensures easy access right the way down into the bottom of the pack. And there's a roomy front compartment for your guidebook, lunch, tin whistle etc, a secure mesh pocket for valuables or your phone, plus internal loops for gear storage for items you want to be able to find fast.

The dual-density structure padded backpanel guarantees optimum comfort – so you won't feel your rocks or friends sticking into you back. And the padded shoulder straps with adjustable load lifters and padded hip belt ensure a comfortable and fully-adjustable carry.

- **Roll top closure extends volume to 46L (38 + 8L), making the volume modular**
- **Self-standing design**
- **Full length front J-shaped zip**
- **Top flap closure with aluminium buckle doubles as a rope attachment (rope stabilizer)**
- **Lateral compression/rope stabilizer with aluminium buckles**
- **Padded belt and shoulder straps with load lifters**
- **Dual-density back panel**
- **Internal loops for gear storage**
- **Generous front compartment**
- **Durable aluminium buckles**
- **All textiles from Fair Wear suppliers**

CRAG HAULER 25

/010030

From the gym to the crag to daily commute – a versatile 25-litre pack with attention to detail and a long-lasting design.

The Crag Hauler 25 is a robust and durable pack that brings the feel of a big wall adventure down to everyday life. It's a bombproof pack with the capacity to stash all your essentials for a session at the gym, a day at the crag or the commute to the office.

The Crag Hauler has a self-standing design with roll top closure, so you can chuck gear straight in when you're in a hurry, and a large full length J-shaped front zip that ensures easy access right the way down into the bottom of the pack. There's a 15" laptop compartment in the backpanel and a roomy front compartment for your guidebook, sandwiches, tin whistle etc. plus a mesh pocket for valuables.

Engineered with durability in mind from haul bag standard tarpaulin and reinforced ripstop nylon with bombproof YKK® zippers. The nylon roll-top closure has an additional PFC-free Durable Water Repellent (DWR) treatment to make the pack water resistant. Ease of use and versatility is the name of the game here, such as the wide-opening funnel shaped roll-top flap that packs away quickly and the top flap closure that also doubles as a rope fixation. For a more stable carry, the lateral compression straps also work as rope stabilizers or can be hidden away in the structure when not in use for a sleeker finish.

When it comes to support and carry comfort, this is definitely way more daypack than rope bag with its ultra-padded back panel, padded shoulder straps and padded belt – so you won't feel your quickdraws sticking into your back.

- **Roll top closure extends volume to 30L (26+4L), making the volume modular**
- **Self-standing design**
- **Designed for durability: tarpaulin + ultra-abrasion-resistant ripstop nylon**
- **Roll top closure**
- **Top flap closure with aluminium buckle doubles as a rope attachment (rope stabilizer)**
- **Full length front J-shaped zip**
- **Lateral compression straps with aluminium buckles**
- **Padded belt and shoulder straps**
- **Dual density back panel**
- **15" Laptop compartment**
- **Generous front compartment**
- **Durable aluminium buckles**
- **All textiles from Fair Wear suppliers**

STAMINA GEAR BAG

/010003

A big-capacity climbing pack for sport, trad and the gym that's easy to pack, unpack, and carry.

product video:

Our stylish Stamina Gear Bag is a top-loader with 41 litres of storage and a full side zip that opens up wide for quick and easy access. Its abrasion-resistant ripstop fabric will cope with plenty of punishment. The main compartment comfortably handles a double rack, harness, helmet, shoes, two half ropes or an 80-metre rope and still has plenty of space for spare clothes, food and drinks.

Simply rock up, zip open the practical, wide-opening system, spread out the detachable tarp to create an organised space to sort the rope and start racking your gear. When it's time to move on or head back out, the roll-top closure system and compression straps make moving between pitches and packing up faster and more efficient. In addition, you also have the option to simply lash your rope to the top of the pack and secure it with the integrated buckle strap.

The foam back panel, ergonomically designed, padded shoulder straps and removable padded waistbelt and chest strap ensure a comfortable carry, even with heavy loads, pointy friends and steep approaches, while the volume-adjust compression straps ensure a stable carry even when the pack is not full. And there is ample additional storage, including a large zipped guidebook pocket and a secure outer zipped pocket for your valuables.

The Stamina is the go-to cragging pack that will hold everything you throw in it with room to spare.

- Large, detachable rope tarp included
- Rope strap with aluminium buckle on top
- Roll-top closure
- Volume-adjust compression straps
- Abrasion-resistant ripstop fabric
- Full zipper opening for easy access
- External pocket for valuables
- EVA foam back panel
- Reinforced grab handles
- Large pocket for guidebooks, topos etc.
- Ergonomic, padded shoulder straps
- Removable padded waist belt
- Removable, adjustable chest regulation

FLOW BACK PACK

/010026

Straight from work to the climbing gym – our minimalist 26-litre Flow commuter pack.

product video:

The Flow Back pack is designed to let you seamlessly combine your climbing with your daily lifestyle. Its medium capacity has plenty of room to accommodate all you need to go to the climbing wall: your harness, rock shoes plus your clothes. Its top-loading design makes it quick and easy to stash and retrieve items and keeps the elements out, while its fabric strikes the ideal balance between being lightweight and durable.

Take it to the library, to the city, to work, to the wall – this minimalist pack covers all bases.

- **Volume: 26 litres**
- **Roll-top closure with a certified Wild Country Astro carabiner and front daisy chain to reduce the volume as required**
- **Front compartment with side zip and keyholder**
- **Additional zipped side compartment**
- **Side zip for direct access to main compartment**
- **Internal laptop compartment**
- **Abrasion-resistant ripstop fabric**
- **Lightweight, adjustable shoulder straps**
- **Adjustable chest strap**
- **Reinforced, padded back panel**

NOTES

MOVEMENT BACK PACK

/010042

NEW

A next-generation 35-litre backpack – for easy access at the gym or crag.

The Movement Backpack is a stylish and accessible solution for rope transport with plenty of space for all your gym essentials. The robust zip to the main compartment opens right up to give you unrestricted access – you can even belay straight from the bag. An integrated tarp helps protect your rope from dirt and dust and there are coloured tie points at both ends for better rope management.

A generous side zip gives access to a side compartment, designed to help you keep dirty clothes etc. separate. And there's a dedicated elasticated pocket for your chalk bag to keep the dust off the rest of your gear.

The choice is yours: the concealable shoulder straps with adjustable chest strap and top reinforced grab handles mean it carries as either a backpack or gym holdall.

With four side compression straps that also serve to securely lash a rope over the top of the pack.

- **Ideal for the gym or crag**
- **Volume: 35 litres – accommodates ropes up to 70 m + all gym essentials**
- **Includes 135 x 100cm rope tarp with coloured tie points**
- **Main compartment accessible via fully-opening YKK #10 top zip**
- **Two zipped side compartments: one big for shoes and chalk bag, one small for tape, topos, phone, keys etc.**
- **Dedicated chalk bag pocket with elasticated closure for dust management**
- **Hide-away shoulder straps with adjustable chest strap and robust hook & loop attachment**
- **Reinforced grab handles: one top handle and two front handles**
- **Four side compression straps with robust plastic buckles double up as a rope carrier**

ROPE TARP

/010032

A full size rope tarp with funky graphic for indoor and outdoor use.

"Own nothing that you do not know to be useful or beautiful." The Wild Country Rope Tarp looks fantastic and is easy to use and transport with its four handles, including a colour-coded tie-in point for better rope management. And when you're down, simply wrap up your rope in the tarp, secure using the external daisy chain and move on.

Available in two different, distinctive designs: the "gearstorm" print was created in collaboration with Indonesian climber and artist Hamdi, while the "heritage" graphic is based on our historic logo.

- 134 x 132 cm
- Sized to accommodate all rope lengths up to 100m
- 4 handles at the border, one colour coded to tie in the rope end
- Folding pocket for rope
- External reinforced daisy chain for packing and transportation
- Robust webbing
- Durable handles
- "Gearstorm" graphic in collaboration with climbing artist Hamdi
- "Heritage" graphic based on our historic logo

CRACK GLOVES

/010033

The ultimate weapon for crack climbing, suitable for all kind of jams and splitters.

Brought up a diet of rough-sided gritstone cracks, trad climbing still runs in our veins. Developed specifically to provide the best combination of protection, sensitivity and dexterity, the synthetic leather Crack Gloves give you a tight and precise fit that keeps its shape over time.

The rubber panels maintain a balance between friction and durability and are positioned to provide good friction with all kinds of jamming – the rubber covers all the way up to the thumb for fist jam, while the synthetic leather covers extends all the way down to the wrist and knuckles to protect the deepest hand jams.

With a reinforced wrist loop to prevent failure and reinforced wrist strap to guarantee durability and precision.

We're jammin'. And we hope you like jammin' too.

- Tough, durable construction that still allows good feel
- Slim profile
- Sticky rubber panel
- 1,2 mm thick robust synthetic leather
- Reinforced wrist loop
- Reinforced finger loops
- Available in 4 sizes: S, M, L, XL

Item No.	Item Description	Size	Colour Code	Colour Text

BETA TALKS

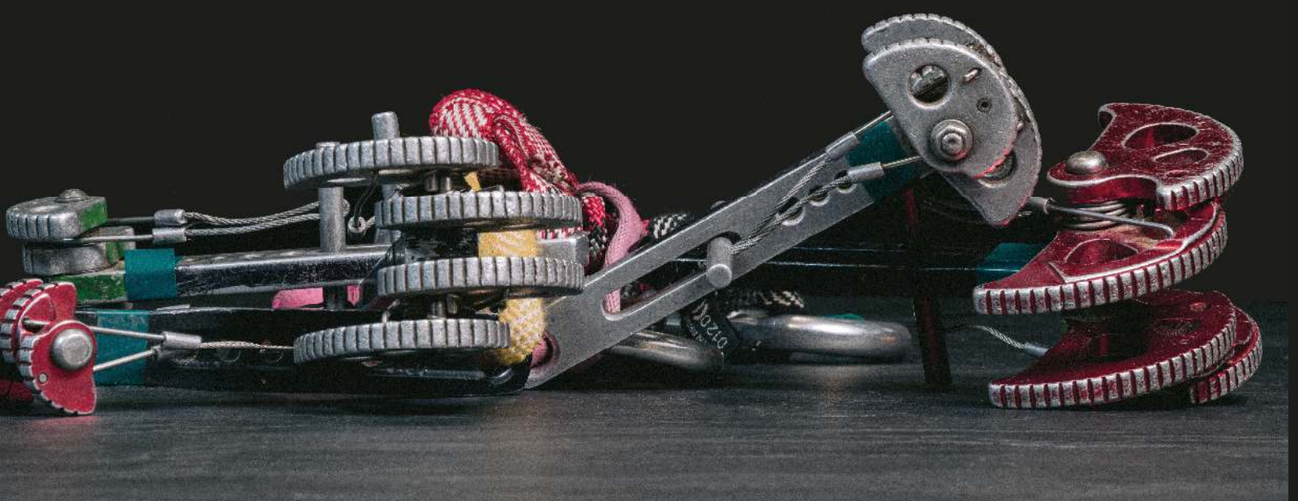

How to look after your gear.

How often do you inspect your gear? When is it time to clean your Friends? How faded can slings and draws look before you should retire them? Our Beta Talks section gives answers to all these questions and more, together with insights on how we develop, test, and certify the equipment you trust.

It takes us to the gym, keeps us safe, allows us to connect with friends, and brings us joy as we climb.
Everyone’s gear deserves care, cleaning, and regular inspections, in celebration of memories of the times together and exciting experiences to come.

Keep an eye on your gear and get your friends to check theirs too.

Spread the love. Share the beta.

Friends

Friendship is built on trust, on passion, on emotion. It’s hard to describe true friendship in words – you have good times and bad times together, but your friends are always there for you. To maintain a friendship and for it to grow stronger, sometimes you need to invest time and care. With your Friends it’s a bit like with a normal friendship between human beings.

They need care and attention. You go through ups and downs and share unforgettable memories. Remember that big whipper you took on the 0.5 – scared, falling, screaming and then the soft, smooth catch when you found yourself dangling on the rope and that massive, overwhelming rush of emotion.

Keep the friendship alive. Show that you care about your Friends and invest some quality time to give them the care they deserve. In general, you should clean, inspect and lubricate your Friends every time you use them. We understand that cleaning your Friends after every climbing session is kind of time consuming, but we recommend cleaning and inspecting the friends at least on a regular basis.

Follow our step-by-step instructions.

1. When to clean your friends?
2. When to inspect your friends?
3. Our full inspection guidelines
4. How to clean your friends?
5. How old is your friend?
6. Main functions inspection
7. Cam lobes
8. Cam lobes – Axle connection
9. How to check the triggers on your friends?
10. How to check the stem?
11. How to check the extendable sling
12. How to apply lubricant

Carabiners, draws and slings

Your draws, carabiners and slings form the backbone of your rack. As the central connectors in your safety chain, they get subjected to plenty of punishment. This is why it's important to check your gear regularly. Moreover, regular inspection and maintenance will prolong its lifespan.

Let's start with some good practise: Don't throw your quickdraws down into the sand/dust/ dirt, this might affect gate function and or cause dust to collect dust on the spring. Keep them in a dark and dry place - damp cellars are a bad idea. Another critical point is fixed draws left in-situ on overhanging sport routes. Treat any in situ gear with suspicion. Always check the carabiner for grooves or burr and the slings for faded colours, abrasion, or cuts. We recommend that you check your gear every time before you climb, especially if it hasn't been used for a while. Get your friends to check theirs too.

1. How to look after your quickdraws
2. Why care is needed with clipping bolts
3. What about fixed gear/ in-situ quickdraws?
4. When should I retire my quickdraws?
5. When should you retire your quickdraw slings?
6. How to inspect your dogbone
7. How to best store your quickdraws
8. Are my carabiners still safe?
9. How to inspect your carabiners
10. What if the gate doesn't close?
11. How to clean your carabiners
12. How to apply lubricant
13. How to perform a visual inspection on your carabiner?
14. Can you still use a carabiner with rope groove?
15. What about if my carabiner has small burrs?

Harness

You often hear people talking about breaking loads of carabiners, rocks, friends and quickdraws, but when was the last time you heard somebody talking about the maximum load capacity of a climbing harness? In fact, how much do you know about yours? Do you know how it gets tested? How safe is your harness? When should you retire it? Blind trust is never great basis to go on, especially when it comes to climbing.

At the end of the day, there are still a number of climbers using harnesses that are well past manufacturer recommended guidelines or even that are visibly damaged and should have been retired with dignity long before they got to that stage.

Don't be one of them. Keep an eye on your harness and get your friends to check theirs too.

Climbers who train on a daily basis are obviously going to have to replace their harnesses sooner than those who only climb once a month. But where you climb makes a difference too. For example, salty environments can attack or grind into the material. Moreover, prolonged exposure to the sun's UV rays can also degrade the structural materials in a harness.

To ensure that your climbing harness still is safe after you have been using it for a number of years, or after a few big whippers, you should inspect it closely.

Here are some guidelines on how to do this.

1. How safe is your harness?
2. How is a climbing harness tested?
3. How to inspect your harness
4. How old is your harness?
5. When should you retire your harness?
6. How can you extend the life of your harness?
7. How to clean your harness?
8. How to wash your harness
9. Advanced inspection checklist
9.1 Waist belt and leg loops
9.2 Belay and tie-in loop
9.3 Bar tacks
9.4 Buckles

FLOW JACKET /095303

0870 ONYX

FABRICS
Padding: 95% Recycled Polyester
Main and lining: 100% Polyamide
810g

Super-warm, padded jacket for belaying and winter bouldering.

Keep cosy and warm at the base of your route.

This insulation jacket is made with a recycled polyester fill and has a brushed internal back panel for extra warmth and moisture wicking.

With climbing-specific features, including large inner mesh pockets to stash your climbing shoes, a 2-way front zip for harness compatibility and a wide loop on the hood to hang it on a branch or other natural coat hook.

- **Tough rock-resistant ripstop shell fabric**
- **180 g recycled polyester fill**
- **Wind and water resistant**
- **Brushed back panel inside**
- **Brushed lining at chin**
- **Drawcord hem adjustment (to adapt sizing)**
- **Hood with stretch binding**
- **2-way front zip to wear with harness**
- **2 large stretch mesh pockets inside (for climbing shoes)**
- **2 zipped hand pockets**
- **1 zipped valuables pocket inside**
- **Wide hanging loop on hood**
- **Unisex sizes from XXS-XL**
- **Wild Country is a member of the Fair Wear Foundation**

product video:

A men's warm, superfluffy, deep-pile fleece for cold-weather climbing and classic styling.

The Spotter is made of shearling-style fleece with fur-like insulation and is specifically tailored for climbing. To keep you topping out even when temperatures drop. Its classic high-pile fleece has a knitted, sheared finish that delivers breathable warmth and pill-resistant durability. The centre front zip has a two-way action to make it easier to access a belay device or ventilate from the bottom. With a snug, fleece-lined neck and two zipped handwarmer pockets.

- **Soft comfort, fast-drying and breathable shearling-style fleece**
- **Back shoulders, front panel and neck in Durastretch fabric**
- **2-way front zip**
- **High-set zipped pockets for harness compatibility**
- **Colour block design**
- **Roundel logo on front, box logo on back**
- **Wild Country is a member of the Fair Wear Foundation**

FABRICS
95% Polyester, 5% Elastane
400g

product video:

A functional sweater for climbing sessions on colder days.

This warm, breathable zipped sweater is made from technical fleece consisting of polyester with additional elastane content to ensure full freedom of movement. The smooth exterior resists snagging and pilling. Inside, the soft brushed finish helps you retain core warmth. Wear it as a mid or outer layer depending on the temperature – or how hard you're cranking. The high collar has a zip garage to prevent chin snagging, while the two-way centre zip allows you to ventilate from both directions and belay in comfort. With a Wild Country roundel and subtle logo binding.

- **Soft, technical stretch fleece**
- **Shaped, ergonomic fit**
- **Colour block design**
- **2-way front zip**
- **2 zipped pockets, high-set for harness compatibility**
- **Stretch hems**
- **Comfortable fit through flatlock seams**
- **Roundel logo on front, branded elastane binding at cuffs and hem**
- **Wild Country is a member of the Fair Wear Foundation**

SESSION PRO HOODY

/095267

A men's midweight technical fleece hoody, designed to be worn as either a standalone piece or as part of a layering system on cooler, active days.

The Session Pro Hoody is a midweight, highly comfortable and warm technical hoody made of 95% recycled polyester fleece with 5% elastane for full climbing freedom of movement. As this fleece is intended to go everywhere with you, weight is crucial and the construction ensures that things stay nice and light.

It makes the perfect fast-drying, moisture-wicking mid layer – whether for a full day at the crag, chilly summer evening session or post-climb analysis over a beer. It's small enough to stash in your climbing pack or haul bag until you need it. The athletic cut and under-helmet hood also work comfortably under your shell.

With soft and stretchy hems at the cuffs, hood and hem that keep it in place under a harness or while carrying a pack and three zip pockets: one at each side and a classic chest pocket.

- Midweight tech grid fleece
- Fast drying and breathable fabric
- Durastretch softshell rear shoulder and front panel
- Full front zip
- Stretch hems
- Slim, athletic cut
- Colour block design
- 3 zip pockets
- Low profile, under-helmet hood
- Wild Country is a member of the Fair Wear Foundation

SPOTTER SWEATER

/095312

NEW

A unique gender-neutral sweater with artistic graphics or a tie-dye effect for outdoor climbing.

The Spotter Sweater is a cut above your average sweatshirt. Its soft, breathable brushed cotton with polyester for extra durability, and a more relaxed fit offer versatile everyday warmth and post-session relaxation. Available with either a distinctive print by climber artist Hamdi or in a tie-dye pattern.

Tie-dyeing is a hand-crafted technique that produces coloured patterns in fabric by tying small portions of material with string before immersing them in a dyebath. This makes each individual sweater a unique item and one-of-a-kind.

- Medium-weight polycotton
- Comfortable and relaxed fit
- Tie-dye pattern or large rear graphic print
- Unisex design
- Wild Country is a member of the Fair Wear Foundation

TENCEL™

A natural material in the apparel collection

ph: carlos-costa

Tencel™ is a natural and biodegradable fibre that features in the new apparel items in this collection. We think it's ideal for making performance fabrics for climbers.

The Wild Country design team explain why:
"Tencel™ is a soft but hardwearing fibre with temperature regulating, moisture-wicking properties that help to keep you cool and dry when you're working hard."

What is Tencel™?
Tencel™ is an environmentally-friendly fibre made from the sustainably sourced raw material wood and produced by environmentally responsible processes. Tencel™ Lyocell eucalyptus wood pulp is dissolved in a closed-loop manufacturing process and then transformed into fibres. Tencel™ is certified as compostable and biodegradable.

Sustainably produced
Tencel™ is made with a low environmental impact. The spinning process recycles the water and solvent used at a recovery rate of over 99%.

Ethically made
Tencel™ is made in better working conditions with living wages, no child labour , freely chosen employment and respect for the environment.

Soft + silky
Tencel™ is softer than silk and smoother and lighter than cotton.

Breathable & moisture wicking
Tencel™ is an extremely breathable and moisture wicking fabric.
Tencel™ fibres have a natural sub-structure with submicroscopic canals between the microscopic fibrils of cellulose fibres that absorb, regulate and release moisture – transporting it away from the skin.

Temperature regulating
Tencel™ feels cool and dry when you're hot and warm and dry when you're cold.
Why? Because Tencel™ fibres manage moisture efficiently and support the body's natural thermal regulating system.

Inhibits odour-causing bacteria
By absorbing moisture more effectively

Feels great on
Tencel™ is naturally soft to the touch due to the smooth nature of its fabrics.

Machine washable
We recommend washing at the conscious choice of 30°C.

SESSION 3 LONG SLEEVE /095268

7300 JOSHUA BROWN

3080 CEUSE BLUE

5270 GREENSPIT

A fast-drying, breathable long-sleeved tee with naturally sweat-wicking moisture management.

Made from a super, soft sustainable blend of lyocell and organic stretch cotton, this is a comfortable tee for active climbing use that looks good and feels good.

It's made using Tencel™ lyocell, which is softer than silk and smoother than cotton, and has the functional performance to keep you cool and dry with its natural moisture management and temperature regulation. What's more, Tencel™ absorbs and releases moisture more effectively than other fabrics, effectively preventing odour build up.

- Comfortable, relaxed fit
- Fast drying and breathable Tencel fabric
- Chest pocket with embroidered topographic map contour lines
- Wild Country is a member of the Fair Wear Foundation

ARTISTIC COLLABORATION

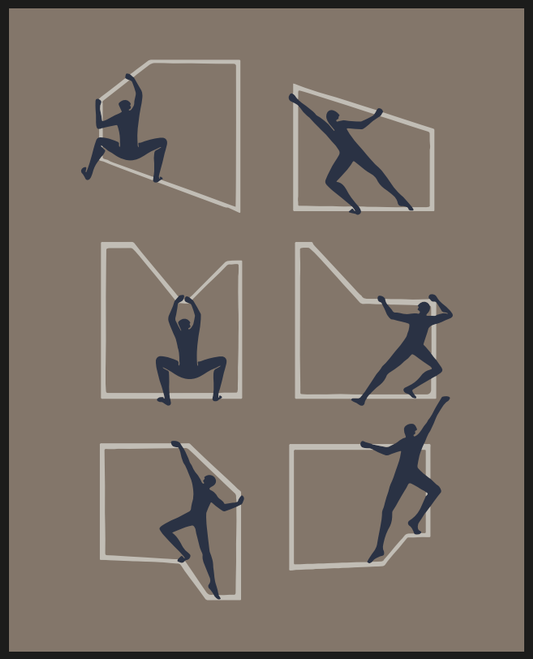

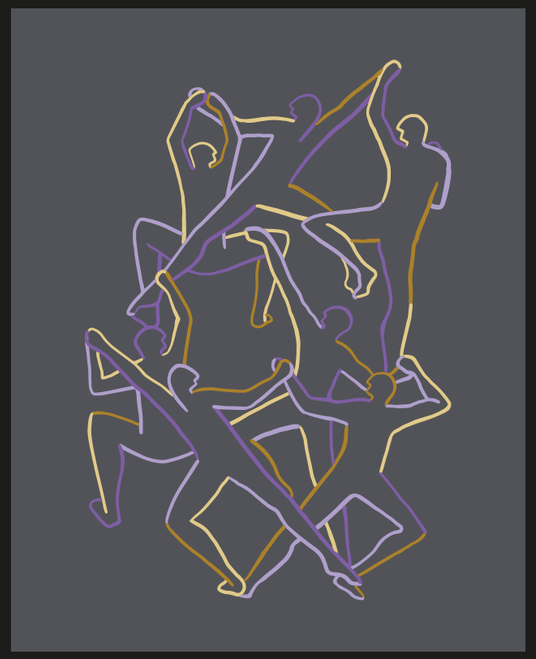

Maria Nagni NEW

Maria is an illustrator and climber based in Alba, Piedmont in northwest Italy.
After graduating from the IED institute in Turin (with time at Leeds Art University in the UK), she chose to work in interior design.
Her illustrations include editorial, mural and environmental commissions, smalti glass mosaics, and patterning.

We got in touch with Maria after we saw a mural she had painted for a boulder gym in Pollenzo near Turin – we really like her designs. Maria is inspired by nature and people – especially the complex nature of relationships and human interaction.
She says her work: “aims to reflect the beauty of observation from different perspectives with illustrations that move in space, populated by colour.”

When she’s not training at the gym in Alba or bouldering outdoors with friends after work, Maria says her favourite place to climb is the beautiful Val Maira in the Alpi Cozie – a mountain range in the southwestern Alps.

ARTISTIC COLLABORATION

Hamdi

Hamdi is a climber and illustrator from Garut, a town in West Java, Indonesia – a valley area surrounded by hills and volcanoes, known for its geothermal springs and beautiful lakes. He started climbing after friends introduced him to the sport in 2013. Since then, he's bolted sport routes on different crags in his hometown and completed trad projects at Batu patapaan.

Hamdi is a self-taught artist and illustrator from a creative family. He started out by drawing topos of his local crags and has gone on to contribute illustrations to climbing guidebooks and publication all over the world from America to Norway and Saudi Arabia. He says he was influenced by the work of Jeremy Collins and that creating climbing art is a way to visualize rock climbing in a different form.

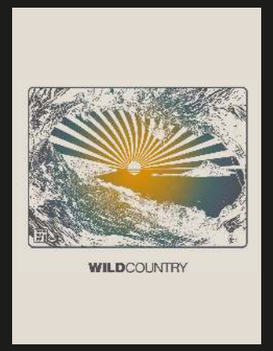

Climbing on Java means making the most of the dry season from May to September. Hamdi keeps fit during the rainy season by strength training and mountain biking. His favourite sport climbing crag is Citatah in Bandung. In the future, Hamdi would like to climb at Lembah Harau on Sumatra and Toraja in Sulawesi.

Terimakasih – Thanks Hamdi!

TintaAlpina

The exclusive prints on the Flow T-shirts in our Spring-Summer 2023 collection have all been created by Tinta Alpina.

The man behind the designs is artist and climber Joan Lillo Arocas. Joan grew up in Berga in Northern Catalonia, climbing with his brother on the beautiful orange and grey limestone of Berguedá, Mont Ral, Siurana and Montserrat. After studying IT, illustration and then art in Barcelona, he moved to Berlin, where he founded Tinta Alpina.

His designs are all inspired by people, places and moments in climbing. Initially, he started out by making his own wooden templates and silkscreen printing his T-shirts made-to-order by hand. As Tinta Alpina has grown, Joan has since moved to digital printing. TintaAlpina tees use 100% organic cotton and merge climbing and art in genderless styles.

When he's not training at the Bouldergarten in Berlin, Joan mainly travels to Frankenjura for sport climbing, but has also visited Piran and Löbejün and enjoys bouldering on Elbe sandstone in Bahratal and Schneeberg/ Snežnik.

He says, though, that his favourite place to climb is Berguedá in the hills of Catalunya.

SESSION 2 DENIM PANT

/095294

NEW

8600 BLUE JEANS

A men's medium-lightweight stretch denim climbing pant that goes anywhere you want it to.

The Session Denim Pant is the go-to summer jean for any self-respecting climber. Cut with a climbing specific design to ensure full functionality moving on rock or in the gym – from wide bridging to precision rockovers on classic mantels. In medium-lightweight washed blue denim that's pleasant for summer wear, yet makes no sacrifices on durability. The low-profile waist section works well under a harness – in fact, these jeans are so comfortable, you might not actually want to take them off.

- **Medium-lightweight stretch denim cotton blend**
- **Relaxed fit**
- **Gusset crotch construction for full range of flexibility**
- **Ankle-cinching drawcord**
- **Slanted hand pockets with cord trim**
- **Webbing belt loops**
- **Subtle stitched Wild Country logo and branded trims**

SPOTTER JACKET /095258

4141 SANDSTONE/ 3960 8671 DARK DENIM/ 3960

A women's warm, superfluffy, deep-pile fleece for cold-weather climbing and classic styling.

Keep warm and carry on sending. Made of fur-like shearling-style fleece and specifically tailored for climbing, the Spotter will keep you moving even when the temperature drops. The timeless, high-pile fleece fabric with its knitted, sheared finish delivers soft, comfortable warmth and pill-resistant durability. The centre front zip has a two-way action to make it easier to access a belay device. With two invisible handwarmer pockets and a snug, fleece-lined neck to seal cold draughts out.

- Soft comfort, fast-drying and breathable shearling-style fleece
- Back shoulders, front panel and neck in Durastretch fabric
- 2-way front zip
- High-set zipped pockets for harness compatibility
- Colour block design
- Roundel logo on front, box logo on back
- Wild Country is a member of the Fair Wear Foundation

SESSION PRO HOODY

/095278

The women's Session Pro is a midweight hoody, designed to be worn as either a standalone piece or as part of a layering system on cooler, active days.

This midweight, highly comfortable and warm technical hooded sweater is made of 95% recycled polyester fleece with 5% elastane for full climbing freedom of movement. Weight is crucial as a fleece goes everywhere with you – the construction ensures that things stay nice and light.

Perfect as a fast-drying, moisture-wicking mid layer, whether heading for a full day to the crag or chilly summer evening sessions. And it's small enough to easily stash in your climbing pack away until you need it. With a feminine, well-fitting cut and cosy under-helmet hood with ponytail opening.

The soft and stretchy fleece has stretch hems at the cuffs, hood and hem to keep it in place under a harness or while carrying a pack. The three discrete zip pockets are all hidden in the seamlines: one at each side and one at the chest.

- **Midweight tech grid fleece**
- **Fast drying and breathable fabric**
- **Durastretch softshell rear shoulder and front panel**
- **Full front zip**
- **Stretch hems**
- **Slim, athletic cut**
- **Colour block design**
- **3 zip pockets**
- **Low profile, under-helmet hood**
- **Ponytail hole in the hood**
- **Wild Country is a member of the Fair Wear Foundation**

NEW

A unique gender-neutral sweater with artistic graphics or a tie-dye effect for outdoor climbing.

The Spotter Sweater is a cut above your average sweatshirt. Its soft, breathable brushed cotton with polyester for extra durability, and a more relaxed fit offer versatile everyday warmth and post-session relaxation. Available with either a distinctive print by climber artist Hamdi or in a tie-dye pattern.

Tie-dyeing is a hand-crafted technique that produces coloured patterns in fabric by tying small portions of material with string before immersing them in a dyebath. This makes each individual sweater a unique item and one-of-a-kind.

- **Medium-weight polycotton**
- **Comfortable and relaxed fit**
- **Tie-dye pattern or large rear graphic print**
- **Unisex design**
- **Wild Country is a member of the Fair Wear Foundation**

MOVEMENT 2 TANK

/095282

5840 MARSH

7300 JOSHUA BROWN

A summer tank designed by women climbers, for women climbers.

Tailored from a soft, silky and sustainable blend of Tencel™ lyocell and organic stretch cotton, the Movement 2 Tank is the ideal solution to keep you pleasantly cool and dry summer climbing trips.

Tencel™ is softer than silk and smoother than cotton and offers naturally wicking moisture management and temperature regulation. It also works to inhibit odour, giving you freedom to move with confidence. The dart fold sewn into the back gives this tank its distinctive three-dimensional shape. Engineered for the female silhouette with a sculpted hemline.

- **Comfortable, shaped fit**
- **Classic design**
- **Sewn in dart at back**

SPOTTER DENIM PANT

/095250

8670 DARK DENIM

Our women's soft, stretchy and ultra-comfortable indigo denim climbing jeans.

A versatile stretch denim pant that works across all styles of climbing, from bouldering to sport or your next redpoint. Designed to cope with everything from big rockovers to desperate top outs. It's the small details, such as the discrete Wild Country branding and slim-fitting leg ends, that make the Spotter stand out. This is a quality women's climbing jean.

- Indigo stretch denim: 76% cotton, 17% polyester, 7% elastane
- Slightly relaxed fit, tailored at the legs
- Leg gusset for freedom of movement
- Low profile waist with webbing belt loops
- Two flat back pockets
- Half-stretch leg ends
- Discrete logo detail
- Wild Country is a member of the Fair Wear Foundation

SOCIAL AND ENVIRONMENTAL SUSTAINABILITY

WILD COUNTRY
IS A PROUD
FAIR WEAR FOUNDATION

LEADER

WWW.FAIRWEAR.ORG

FAIR WEAR FOUNDATION MEMBER

Since 2013, we have been members of the Fair Wear Foundation (FWF) and for the fourth year in a row we have achieved the prestigious Leader status. This independent non-profit organization assists us to work towards ensuring that all sewing factories comply with the stringest FWF Code of Labor Practice and thus fulfill the highest standards for fair working conditions.

ETHICAL SOURCING

Our Code of Conduct (CoC) is our prerequisite for the collaboration with partners along our supply chain. We decided to adopt a management system that allows us to regularly verify that the principles contained in this document are respected by and collaboratively implemented with our partners. Our main partner to work towards fair working conditions in our supply chain is the Fair Wear Foundation.To learn more about FWF, watch the video below or visit www.fairwear.org.

To know more, check the latest Brand Performance Check Report on our website.

100% ORGANIC COTTON

ORGANIC COTTON

Cotton clothing provides you with a wide range of next to skin luxuries; soft, comfortable, and hypoallergenic not to mention the colorful patterns and designs that represent who you are. Organic cotton helps ensure these benefits are not lost to a negative environmental impact. The production of Organic Cotton is eco-friendly and utilizes natural fertilization through crop rotation and organic composts like manure. It also eliminates the use of pesticides and toxic dyes which run into the groundwater. And let's not forget the little guy; organic cotton benefits small farmers by providing an opportunity to sell their crops more easily. So wrap yourself in it, sweat in it, wear it to the pub; whatever luxury you take in wearing cotton take luxury in organic cotton.

THW STANDARDS

CE CERTIFICATION – Where required by law (European Union Directive 89/686/EEC – for Personal Protective Equipment).
CE marking on Wild Country products confirms the adherence to the (EU) Regulation 2016/425 on personal protective equipment.
Wild country Personal Protective Equipments comply with the requirements of the (EU) Regulation 2016/425.

UKCA CERTIFICATION – UKCA marking on Wild Country products confirms the adherence to the Regulation 2016/425 on personal protective equipment as brought into UK law and amended.
Wild country Personal Protective Equipments comply with the requirements of the Regulation 2016/425 on Personal Protective Equipment as brought into UK law and amended.

UIAA SAFETY LABEL – The UIAA Safety Label can be awarded for mountaineering and climbing equipment that meets the requirements of the relevant UIAA standard. In order to prevent unnecessary multiplicity of standards, the UIAA standards are based on the European standards (EN standards, also called CEN standards). The EN standards, in turn, are based on the former UIAA standards, which were the first standards for mountaineering and climbing equipment in the world. The present UIAA standards may have higher and/or additional requirements above those in the EN standards.

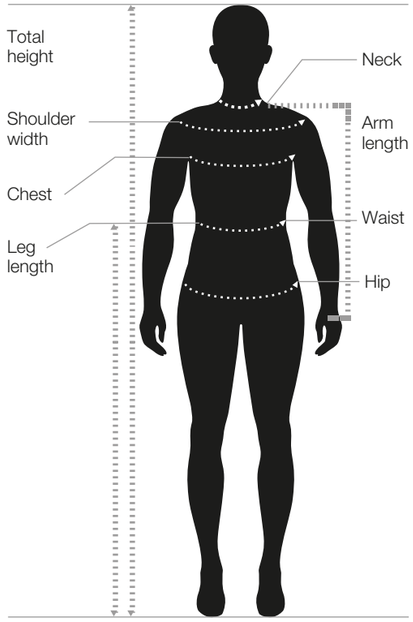

ISO 9001 – The organisation responsible for our ISO 9001 Quality System is TÜV Thüringen e. V. issued to Oberalp SpA
Ernst-Ruska-Ring 6,
07745 Jena, Germany

INSTRUCTIONS/WARNING –

In accordance with (EU) Regulation 2016/425 on Personal Protective Equipment, Wild Country supplies detailed instructions with all its products and recommends that the user reads and understands these instructions before use. If you are in doubt, require further advice or would like a copy of the instructions for any Wild Country product, you should contact us at the address printed in this Work Book. It is the user's responsibility at all times to ensure that he or she understands the correct and safe use of any equipment supplied by Wild Country, uses it only for the purposes for which it is designed and practises all proper safety procedures. The manufacturer or supplier will not accept any responsibility for damage, injury or death resulting from misuse.

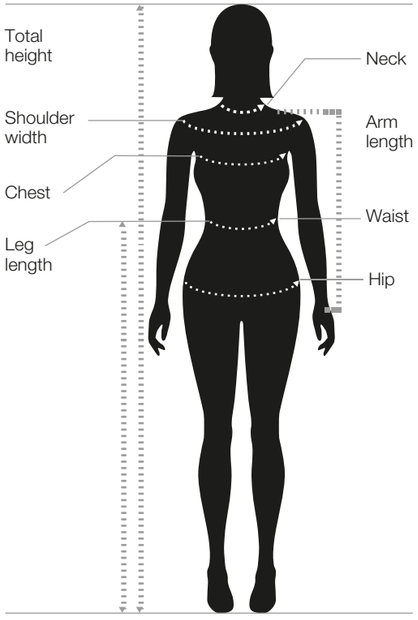

GUARANTEES – Wild Country guarantees all of its products from new against defects in workmanship or materials, unless the product has been worn out, misused, or abused, as determined by our examination. Wild Country will repair or replace any product as appropriate.
This guarantee is in addition to your statutory rights which remain unaffected. Wild Country reserves the right to modify without notice the design and specifications of products on this website. All weights, dimensions & sizing specifications where quoted are nominal.
